

**Questions for theoretical part
of 6-th year students finale module control**

1. Furunkul and carbunkul: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
2. Pancreatic cyst: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
3. Postthrombophlebitic syndrome: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
4. Abscess and flegmon of subcutaneous fat: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
5. Disease of operated bile duct: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
6. Lymphedema: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
7. Panaricium: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
8. Disease of operated stomach (Syndrom of afferent loop): etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
9. Thromboembolism of pulmonary artery: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, first aid, treatment, prophylactic.
10. Gydradeniti and lymfadeniti: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
11. Disease of operated stomach (Dumping-Syndrom): etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
12. Atherosclerosis obliterans: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
13. Flegmon of etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
14. Galdbladder disease: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
15. Thyroid cancer: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
16. Flegmon of neck: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
17. Adheasive disease of abdomen: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment, profilactic.
18. Thrombophlebitis of deep vein of extremities: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
19. Subpectoral flegmon: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
20. Mecanical jaundice: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
21. Aortic aneurism: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
22. Place of antibioticotherapy and antibioticoprofilacty in treatment of surgical patient.
23. Syndrom of portal hypertension: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
24. Chronic mesenteric ischemia: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
25. Surgical sepsis: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic

26. Choledocholytiasis and chronic calculosis cholecystitis: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment. Goiter of Hashimoto, acute thyroiditis: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment. Clinical presentation and treatment of thyrotoxic crisis.
27. Surgical sepsis: treatment.
28. Trophic ulcer as a complication of venous pathology: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
29. Ulcerogenic endocrine disease: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
30. Syndrom of systemic inflammation response: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
31. Syndrom of diabetic peds: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
32. Acute mesenteric ischemia: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, first aid, treatment, prophylactic.
33. Peritonitis: etiopathogenesis, classification, clinical presentation, diagnostic.
34. Acute limb ischemia: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, first aid, treatment, prophylactic.
35. Transplantology: choose of donor, keep and transport of organ, transplantation.
36. Peritonitis: treatment.
37. Thrombophlebitis of superficial vein of extremities: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment. 3. Endemic goiter, Thyrotoxicosis: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment, profilactic.
38. Retroperitoneal flegmon: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment, profilactic.
39. Pyloroduodenal stenosis: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment, profilactic.
40. Varicosity: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
41. Surgical complication of infection disease.
42. Disease of operated stomach (peptic ulcer of anastomosis): etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
- 43.** Enderteritis obliterans: etiopathogenesis, classification, clinical presentation, laboratory and instrumental diagnostic, treatment.
44. Endemic and sporadic, euthyroid and thyrotoxic goiter: causes, pathogenesis, clinical picture, special methods of examination of patients, differential diagnosis, modern methods of conservative and surgical treatment of diseases. Preoperative preparation. Surgical methods.
- 45.** Thyroiditis: types, causes, pathogenesis, clinical picture, therapeutic tactics, rehabilitation of patients. Thyrotoxic crisis. Clinic, treatment, prevention
